

2016 Mathematics Standards of Learning
Algebra Readiness Formative Assessment

8.16a

1. Draw a sketch of a line that has a slope of zero and describe how you know the slope is zero.

2. Select the two graphs with a negative slope.

Algebra Readiness Formative Assessment

3. What is true about the equation for the graph shown?

- A. It has a slope of -2.
 - B. It has a slope of -1.
 - C. It has a slope of 0.
 - D. It has a slope of 2.
4. What is true about the slope of the line graphed?

- A. The slope is positive.
- B. The slope is negative
- C. The slope is zero.
- D. The slope cannot be determined.

5. Which of the following statements is true about the line graphed below?

- A. The slope of the line is positive because the line is increasing from left to right.
- B. The slope of the line is positive because the line is decreasing from left to right.
- C. The slope of the line is negative because the line is increasing from left to right.
- D. The slope of the line is negative because the line is decreasing from left to right.
