

# Fall 2023 Growth Assessment

**(Effective for Fall 2024)**

In the 2023-2024 school year, students in Virginia public schools will take growth assessments in Grades 3-8 Reading and Mathematics. Legislation passed in the 2021 Virginia General Assembly ([HB2027](#) and [SB1357](#)) requires these assessments be administered to students once in the fall and once in the winter (mid-year). In addition to the growth assessments, the Standards of Learning (SOL) tests for Grades 3-8 Reading and Mathematics will continue to be administered. Please note that, based on a recent change, the Fall 2023 Growth Assessment for Grade 6 is now based primarily on Grade 5 content. This change is intended to ensure that students are administered test questions on the Fall 2023 Growth Assessments that are based on content that should have been taught during the previous school year. Test items at or below a student's grade level may be delivered online via the computer adaptive algorithm as appropriate for the student. Please note this test may have test questions that assess Grade 4, Grade 5, or Grade 6 English SOL. Students who meet the criteria for needing a paper test will receive Grade 5 English SOL test items.

## Grade 6 Reading (Based on Grade 5 Standards of Learning) Test Blueprint Summary Table

Reporting Category	Grade 5 Standards of Learning Eligible to Appear in the Fall 2023 Growth Assessment	Number of Items Fall 2023 Growth Assessment
