

Name _____

Date _____

Brownie Pans

Juan, Shantel, and Dave each had a pan of brownies. The pans were the same size.

- Juan ate half of his pan of brownies.
- Shantel ate a smaller amount of her pan of brownies than Juan.
- Dave ate a smaller amount of his pan of brownies than Shantel.

What fractions could describe the amount of each pan of brownies that Juan, Shantel, and Dave ate? Show your work and explain your thinking.
