

Growth Assessment 2023-2024  
Mathematics

Winter

What is this report?

This report shows your child's performance on the Virginia Growth Assessments. This report, combined with teacher input, classroom work, report cards, and the Student Detail by Question reports, gives families and teachers a more complete picture of student progress. You can use these results to help identify where your child is doing well and where additional support may be needed.

Your child's academic progress at this point in the school year

The chart below shows your child's score on two of the three growth assessments your child will take over the course of this school year. These scores can be used to understand if your child is learning the content and skills expected in the Virginia Standards of Learning. If the growth assessment score is staying the same or decreasing, it may be helpful to ask the teacher if your child needs more support in this subject area.

Based on your child's score on each Growth Assessment shown above, your child:		
needs additional support.	is at risk.	is generally well prepared.
		
1050 - 1495	1496 - 1602	1603 and above

# How You Can Help Support Your Child's Learning

## Guidance for Parents & Caregivers:

**Step Number One:** Talk to your child's teacher to learn more about ways you can give support from home. Here are some key questions you can ask:

- Is my child on grade level in all classes?
- With what skills does my child need more support?
- How can I support these skills from home?
- Are there other classroom tests of which I should be aware that will help me understand my child's progress?

**Step Number Two:** Access free resources available for you and your child to use at home. Here are some suggestions you can use:

## Parent & Caregiver Resource Page

<https://www.doe.virginia.gov/teaching-learning-assessment/Student-assessment/parent-caregiver-resources-for-growth-assessments>

Engaged parents and caregivers are a critical part of a child's successful learning experiences. Reading with students and talking about what is being read is important to the development of strong readers. Talking about and doing math within the family is a great way to engage students and encourage success. Visit this page to see online resources available for reading and mathematics to help parents and caregivers support their children and continue their learning at home.

## Guiding Questions for Caregivers and Parents

<https://www.doe.virginia.gov/home/showpublisheddocument/48999/638302914172630000>

This document is a starting point for caregivers or parents who are preparing for the opportunity to sit side by side with teachers to celebrate growth and to advocate for additional support.
