ELA Standards Introduction & Guiding Principles

The 2024 *English Standards of Learning* reflect the commitment to raise expectations and increase the rigor of our education to better align with the demands of the present and future world.

This introduction provides a brief overview of the following context around these revised standards:

- Guiding Principles
- Overview of How these Standards are More Coherent and Rigorous
- The Foundational Role of the Science of Reading

Guiding Principles

These English Standards serve as the expectations of what students must master to be prepared for life beyond high school. They were developed with the following specific goals in mind:

1. **Inspire learners to embrace the joy of unlocking new knowledge, worlds, and experiences through these Standards.** Mastering these Standards not only prepares Virginia learners for success in life, but it should also bring delight, pleasure, and connection as lifelong learners. The expression of ideas, feelings, and insights is one of the greatest joys and unique traits of being human. These Standards aim to help remind us of all our shared humanity across time, geography, and culture.
2. **Raise the floor; remove the ceiling.** Over half of our 3rd through 8th graders cannot read on grade level and our 4th graders experienced the greatest learning loss in reading across the nation on the Nation’s Report Card (NAEP). While we work diligently to get every student reading to grade level, we must also tailor our implementation of these standards to ensure those students who are on track or already ahead of grade level have opportunities to soar. There should be no limit to how far or how fast our students can progress.
3. **Ensure every child is reading by 3rd grade on or above grade level.** Children who are not reading by 3rd grade are less likely to graduate, go on to higher education, secure family-sustaining jobs or be successful in life. This involves exposing students to complex texts at or above their reading level as well as increasingly more advanced vocabulary. Reading on or above grade level is a nonnegotiable expectation for Virginia’s education system. These Standards lay out expectations to make this goal a reality.

4. **Prepare every graduate to be an effective communicator.** These Standards are designed to nurture strong readers, effective writers, compelling speakers, and active and engaged listeners. The family-sustaining jobs of today and the future require the ability to problem solve and collaborate in and across teams; this demands strong analytical, presentation, and communication skills. This goal is critical to producing future members of our communities, our economy, and our democracy.
5. **Teach reading based on research — embrace the science of reading.** We update our standards at least every seven years because we are continuously learning more about how to effectively prepare students for life. This latest version of our English standards is fundamentally grounded in the research-based approach to reading, commonly called the Science of Reading, but more colloquially referred to as Phonics. The Science of Reading is grounded in research about literacy. The 2024 Standards reflect the current research on the importance of explicit, systematic, and sequential instruction in all aspects of literacy development: phonemic awareness, phonics, fluency, vocabulary, comprehension, and writing. We know that to ensure all students’ success we need to support teachers with materials, training, coaching, and resources that aligns with current science of reading research. We know how to teach our children how to read, and we know the materials, the teacher training and coaching, and curriculum that will help our students be successful.
6. **Strengthen foundational skills.** In our digital age, some people claim that access to technology negates the need to master foundational skills in writing. These standards ensure every child can demonstrate mastery in spelling, grammar, penmanship, and the ability to communicate their thoughts in writing. We value the art of cursive writing and therefore we must ensure our students know how to read and write in cursive. But most importantly, we must guarantee that all students are fully literate, which includes a command of all the necessary skills required of excellent writers. When our students can write, they have to ability to communicate their thoughts, actively participate civically, and engage in high wage professions of their choice.
7. **Prioritize strong research, analytical and synthesis skills.** Students who graduate with strong competencies in research and analysis will have the durable skills that are prized in our most in demand jobs. The ability to analyze digital and traditional media for bias and

accuracy and to question assumptions and not accept conventional wisdom are increasingly important skills. Being able to defend a point of view with facts and evidence and present a compelling thesis and case are some of the most important skills for success in life after high school.

8. **Ensure students demonstrate competency with reading, writing, discussing, and presenting a broad selection of both informational and literary texts and books.** To be prepared for life, learners must demonstrate competency with deciphering and making meaning of materials ranging from periodicals to poetry. It also means mastering the ability to write for different audiences and different purposes, including expository, analytical, persuasive, narrative and creative writing. The ability to analyze and synthesize the main themes from a research journal, a Greek play, a disciplinary text or digital media is a skill that is critical for success in school, work, and in life as a citizen.
9. **Expose students to a wide variety of genres, authors, and great works prior to graduation.** We have a continuously expanding selection of great literature, and our students should be exposed to literary work across cultures, eras, and viewpoints. In addition, there are critical pieces of literature that scholars and Virginians believe are fundamental to being part of a well-rounded education because they capture the shared human condition in such a powerful way. While the state does not provide a list of prescribed books to read, there is a strong belief that every Virginia graduate will have read a wide selection of classical and contemporary literature. Virginia learners should be exposed to foundational authors such as Homer and Shakespeare as well as masterpieces from different genres, cultures, geographies, and time periods.
10. **Utilize technology and Artificial Intelligence (AI) as tools for teaching and learning around these ELA standards, but also as a topic of instruction, in a safe, ethical and responsible manner.** Since the last revision of these ELA standards, the role of technology and the power of AI in our lives has exploded. Technology has transformed how we communicate—how we read, write, gather information, and present our ideas. AI has the power to transform all of that and to make access to knowledge more efficient and broader than ever thought possible. Both bring immense risks—around privacy and security of data, cheating and ethical issues, and dampening the benefits of iteration and struggle in the learning process. Students must know how to use both tools—technology and AI—effectively, ethically, and responsibly.
11. **Use judgement and a transparent process to ensure materials and topics are developmentally appropriate.** School divisions should have a transparent public process

that involves parents for making, communicating, and implementing decisions about age-appropriate topics, materials, and books to be included in the curriculum.

DRAFT

Overview of How these Standards are More Clear, Aligned and Rigorous

These revised standards are more rigorous and coherent than the existing standards. This ensures every student is prepared to be an effective communicator in our increasingly complex world and ready for success in college and career.

The 2024 English Standards of Learning improvements include:

- Foundational skills at each grade level in (K-8) to align with the Virginia Literacy Act and ensure explicit, systematic and evidence-based literacy instruction for our youngest learners. The sub strands included to address these areas are Print Concepts, Phonological and Phonemic Awareness, Phonics & Word Analysis, and Developing Skilled Readers & Building Reading Stamina.
- Connections across “The Foundations for Reading Skills” and “The Foundations for Writing standards” in K-5 so that teachers explicitly focus on foundational skills that students must control to be successful as writing becomes more complex.
- A new structure that presents a “skills first” approach in each grade level to emphasize the grade level skills readers need to tackle to engage in more difficult material.
- Foundational transcription skills such as handwriting and spelling are essential for students to be able to express their ideas through writing. The Foundations for Writing standards work in tandem with the writing standards as students move from foundational writing skills to engaging in the writing process through grade twelve.
- Required applications of skill mastery.
- Emphasis on “Developing Skilled Readers and Building Reading Stamina standards in K-12” are designed to address the essential areas of reading fluency, text complexity, textual evidence, stamina, and deep reading on topics to build knowledge and vocabulary and reading strategies. These "how to read standards" highlight the most critical research and evidence-based elements of literacy, which will allow for a focus on more rigorous grade-level expectations throughout the strands.
- Increased rigor in the secondary level. Through actions that require evaluation, analysis, and critique of texts and topics through discussion, reading, writing, and when conducting research, the standards expect writing for a variety of audiences and purposes, including expository, persuasive, argumentative, analytical, reflective, and technical. The purpose of this structure is to ensure that students are prepared and understand how to write for different purposes in their postsecondary experiences.
- Integration of the processes of critical reading, writing, research, and communication, to deepen students’ learning, critical thinking, and achievement across all content areas.

The Foundational Role of the Science of Reading

Over the past five years, a revolution has occurred in literacy instruction across the country. Virginia has led this transformation and created the most comprehensive literacy policy frameworks in the country. The landmark 2022 Virginia Literacy Act provides the mandate and

resources to transform early literacy instruction as well as spurred the expedited revision of the *English Standards of Learning*.

The Virginia 2024 *English Standards of Learning* are guided by the same evidence and research within the 2022 Literacy Act. These standards are rooted in a sounds-first, systematic approach to teach early grades reading as well as a rigorous and comprehensive approach to building strong readers, writers, and communicators throughout the upper grades.

Currently only 35% of U.S. fourth grade students are reaching grade level proficiency, and in Virginia, 32% are reaching grade level proficiency based on the 2022 National Assessment of Educational Progress. Over the past ten years, literacy proficiency in Virginia has dropped 11 percentage points in grade 4 and 6 percentage points in grade 8.

Reading proficiently by third grade has a direct impact on high school graduation. A student struggling to read on grade level in third grade is four times more likely to drop out and struggle with lifelong success, health, and wellness.

Students benefit from explicit and systematic instruction in all areas of literacy including phonological and phonemic awareness, phonics, fluency, vocabulary, comprehension, and writing. The Standards outline the explicit instruction, which involves directly explaining concepts, consistent feedback, and support to achieve mastery. The methodology outlined in the Standards ensure that learning intentions are clear to both the teacher and the students.

The 2024 *English Standards of Learning* lay the groundwork for teachers to use an evidence-based approach that starts with a strong foundation, develops a rigorous progression, and creates an intentional focus on applying skills to rigorous texts and learning experiences. This will create a clear roadmap for all Virginia students to achieve college, career, and military readiness by the end of their high school careers.

English Standards of Learning for Virginia Public Schools 2024 Kindergarten

The kindergarten student will be immersed in a text and language rich environment to develop communication skills, phonological and phonemic awareness, print awareness, vocabulary, comprehension, and an appreciation for reading and writing. English Standards of Learning for Virginia Public Schools

2024 Grade 1

Developing foundational literacy skills is a priority in first grade. These skills include phonological and phonemic awareness, print awareness, phonics, fluency, language usage, and handwriting. A student in first grade will learn and apply more complex phonics patterns when reading and writing while increasing their automaticity in reading words and connected text. The student will gain fluency when reading and rereading both phonetically controlled and uncontrolled texts. While foundational skills are a focus, it is equally important that the student continue to build world and word knowledge. Immersing the student in a text and language rich environment supports the student’s development of communication skills, vocabulary, comprehension, and an appreciation for reading and writing. The first-grade student will apply comprehension strategies when reading and listening to literary and informational texts and collaborating in classroom discussions. To support knowledge building, an emphasis will be given on materials connected to mathematics, science, and history and social science. The first-grade student will write in a variety of forms for specific purposes.

English Standards of Learning for Virginia Public Schools

2024 Grade 7

At the seventh-grade level, the student will continue to deliver multimodal presentations individually and in collaborative groups. The student will also interpret information presented in diverse media formats and share responsibility for collaborative work, as both a contributor and a facilitator, while striving for consensus to accomplish goals. The student will continue the study of word origins and roots and begin to distinguish among connotations of words. There is a continued emphasis on text reading and fluency as students continue to read and comprehend complex literary and informational texts. In literary texts, the student will analyze point of view, interpret the author's style, and compare and contrast texts on similar topics. When reading informational texts, the seventh-grade student will analyze how authors use evidence, facts, and opinions to support points in multiple texts. Reading and writing will continue to be an integrated process wherein the student will use authors and texts read as models when working on techniques in their own writing. The student will continue to write for a variety of audience and purposes, focusing on the development of a clear central idea, tone, and voice. In persuasive writing, the student will be able to clearly state claims using evidence from a text or personal experience as support. The seventh-grade student will be expected to have greater control over the conventions of writing. In research, the student will find, evaluate, and select appropriate resources for an oral, visual, written, or multimodal research product. They will evaluate the validity and authenticity of sources, and will apply research techniques to quote, summarize, and paraphrase findings. These skills are necessary for success in future postsecondary education and workplace environments.

English Standards of Learning for Virginia Public Schools

2024 Grade 9

In ninth grade, the student will continue to build upon skills previously learned in earlier grades with a variety of texts. There is a continued emphasis on reading comprehension by explaining, comparing, and analyzing literary and informational texts. In literary texts, the student will apply knowledge of literary terms to describe, differentiate, and analyze a variety of genres. In ninth grade, there will be an increased emphasis on informational reading, and the student will examine the function of a text within context. The student will demonstrate their comprehension by writing and use the texts read in class to understand the author’s craft to compose original compositions. The student will continue to expand vocabulary using the structural analysis of roots and affixes, as well as figurative language, to understand complex words. With an explicit focus to integrate reading and writing processes, the grade-nine student will use mentor texts as models to plan, draft, revise, and edit expository writing in preparation for postsecondary work and career. There is also an emphasis on persuasion, defending a position using counterclaims, reasons, and evidence from credible sources. The student will continue to work in collaborative groups assisting with setting guidelines and working toward consensus. The student will evaluate sources and examine media messages to analyze the content, author’s viewpoint, and structure. The student will select, use, and analyze multimodal tools to create presentations both independently and in small groups. The student will apply research techniques to create independent research products and analyze and synthesize information gathered from diverse sources by identifying misconceptions and possible bias, citing both quoted and paraphrased information using either MLA or APA style.

Developing Skilled Readers and Building Reading Stamina

9.DSR The student will build knowledge and comprehension skills from reading a range of challenging, content-rich texts. English Standards of Learning for Virginia Public Schools

2024 Grade 12

In twelfth grade, there is a sustained emphasis on reading comprehension by comparing, analyzing, and evaluating literary and informational texts. The student will examine and analyze literary texts by British authors evaluating how authors use key elements to contribute to meaning and interpreting how themes are connected across texts. The student will continue development of vocabulary, with attention to connotations, idioms, classical allusions, and figurative language. With an explicit focus to integrate reading and writing processes, the grade-twelve student will use mentor texts as models to analyze and evaluate informational text and use the writing process to write with an emphasis on technical writing for multiple purposes and audiences to create focused, organized, and coherent writing. The student will write to a standard acceptable to both the workplace and to postsecondary education. The student will explain and analyze how media influences beliefs, interpretations, and behaviors. The student will create interactive multimodal presentations both independently and in collaborative groups. The student will produce a research product synthesizing information from primary and secondary sources while maintaining ethical and legal guidelines for gathering and using information. The student will continue to demonstrate the ability to work within diverse teams and collaborative groups.

*The bodies of literature for grades 10, 11, and 12 are interchangeable and may be taught in any of these grades.

Developing Skilled and Building Reading Stamina

12.DSR. The student will build knowledge and comprehension skills from reading a range of challenging, content-rich texts. - B. Proficiently read and comprehend a variety of literary and informational texts that exhibit complexity at the higher range of the grades 11-12 band to generate and respond logically to literal, inferential, evaluative, synthesizing, and critical thinking questions (See the Quantitative and Qualitative Analysis charts for determining complexity in the Appendix.) **(Text Complexity, 2-12)**.
- C. When responding to text through discussions and/or writing, draw several pieces of evidence from grade-level complex texts to support claims, conclusions, and inferences, including quoting or paraphrasing from texts accurately and tracing where relevant evidence is located **(Textual Evidence, K-12)**.

English Standards of Learning for Virginia Public Schools

Appendix

Virginia’s Approach to Text Complexity

The Standards define a two-part model for determining how easy or difficult a particular text is to read and grade-by-grade specifications for increasing text complexity in successive years of schooling. Coupled with grade-specific reading standards that require increasing sophistication in students’ reading comprehension, the standards approach the intertwined issues of the what and the how of student reading. The standards’ model of text complexity consists of two equally important parts: (1) quantitative measures of text complexity and (2) qualitative measures of text complexity.

Quantitative Analysis Chart (below) is correlated to college- and career-readiness levels. It measures text features best “seen” and assessed by a computer, including word frequency, sentence length and variety, and text cohesion.

Qualitative Measures (below) appraise those characteristics best judged by human evaluation, including text structure, language clarity, knowledge demands, and purpose.

The first step is to use quantitative measures to locate a text within a grade band in the chart below. The second step is to assess the qualitative complexity of a text to determine if the text is slightly, moderately, very, or exceedingly complex for that grade band (Qualitative rubrics are below.). That is, whether the text belongs in the upper, lower, or middle of the quantitative band and, on occasion, whether the qualitative measure eclipses the quantitative measure by placing the text in a wholly different grade band. Both measures are needed for an appropriate placement of a text.
